1. Executive Summary

- **Project Overview:**

- TechStore is a retail company specializing in electronics. The company aims to launch a new e-commerce platform that allows customers to purchase products online, manage their orders, and track deliveries. The platform will integrate with the existing inventory and customer management systems.

- **Business Objectives:**

- Increase online sales by 30% within the first year of launch.
- Improve customer satisfaction by providing a seamless online shopping experience.
- Reduce order processing time by automating key business processes.

2. Background and Business Needs

- **Background:**

- TechStore has traditionally operated through physical stores and third-party online marketplaces. However, the company lacks its own e-commerce platform, which limits direct customer engagement and brand control. With the growing trend of online shopping, TechStore needs to establish a robust e-commerce presence.

- **Business Problems/Opportunities:**

- **Problems:**

- Inconsistent brand experience across third-party platforms.
- Limited customer data collection and analysis.

- **Opportunities:**

- Direct customer interaction and personalized marketing.
- Expansion of market reach and increase in revenue.

3. Scope

- **In-Scope:**
 - Development of a responsive e-commerce website.
 - Integration with existing inventory management systems.
 - Implementation of a secure payment gateway.
 - Customer account management and order tracking features.
- **Out-of-Scope:**
 - Physical store management.
 - Development of a mobile app (planned for a future phase).
 - Integration with third-party logistics providers (manual process in Phase 1).

4. Business Requirements

- **High-Level Requirements:**
 - The platform must allow customers to browse, search, and purchase products online.
 - The platform must provide a secure and user-friendly checkout process.
 - The platform must integrate with the existing inventory system for real-time stock updates.
- **Detailed Requirements:**
 - **Browsing & Search:**
 - Customers can filter products by category, price, brand, and ratings.
 - Search results should be displayed with pagination and sorting options.
 - **Checkout Process:**
 - The system must support multiple payment options (credit card, PayPal, etc.).
 - Customers should receive order confirmation via email and SMS.
 - **Inventory Integration:**
 - Real-time stock levels must be displayed on the product pages.

- Out-of-stock items should be clearly marked and prevented from being added to the cart.
- **Non-Functional Requirements:**
 - **Performance:** The platform should support up to 10,000 concurrent users without significant performance degradation.
 - **Security:** The platform must comply with PCI-DSS standards for handling payment information.
 - **Usability:** The platform should maintain a consistent and intuitive user interface across devices.

5. Stakeholder Analysis

- **Stakeholder Identification:**
 - **Executive Management:** Sarah Green (CEO)
 - **Marketing Team:** Alice Johnson (CMO)
 - **IT Team:** Bob White (CTO), Jane Smith (Lead Developer)
 - **Customers:** End-users who purchase products from the platform.
- **Stakeholder Requirements:**
 - **Executive Management:** Increase revenue and brand visibility.
 - **Marketing Team:** Access to customer data for personalized marketing campaigns.
 - **IT Team:** Seamless integration with existing systems and minimal downtime.
 - **Customers:** Easy-to-use platform with fast, reliable service.

6. Project Constraints and Assumptions

- **Constraints:**
 - Budget of \$500,000 for the initial development phase.
 - Timeline of 6 months for project completion.
 - Integration must use existing ERP systems without requiring major changes.

- **Assumptions:**
 - All necessary APIs for integration will be available and functional.
 - Customer adoption will increase by at least 20% within the first 6 months.

7. Risk Management

- **Identified Risks:**
 - **Risk:** Delay in API availability for integration.
 - **Impact:** High
 - **Likelihood:** Medium
 - **Risk:** Underestimation of development time.
 - **Impact:** Medium
 - **Likelihood:** High
- **Mitigation Strategies:**
 - Regular communication with the API provider and having contingency plans.
 - Buffer time in the project schedule to accommodate potential delays.

8. Requirements Traceability Matrix (RTM)

- **Mapping Requirements to Objectives:**

Requirement ID	Requirement Description	Business Objective Supported
BR-001	Platform must allow customers to purchase products online	Increase online sales
BR-002	Integration with inventory system for real-time updates	Improve customer satisfaction

9. Acceptance Criteria

- **Success Criteria:**

- The e-commerce platform goes live with zero critical issues.
- Achieves a 30% increase in online sales within the first year.
- Customer satisfaction scores increase by 20%.

- **Deliverables and Milestones:**

- **M1:** Complete design and wireframes (Month 1).
- **M2:** Backend development completed (Month 3).
- **M3:** Integration and testing completed (Month 5).
- **M4:** Go-live and post-launch support (Month 6).

Glossary of Terms

- **ERP:** Enterprise Resource Planning, a type of software used to manage day-to-day business activities.
- **PCI-DSS:** Payment Card Industry Data Security Standard, a set of security standards for organizations that handle credit card transactions.

Appendices

- **Supporting Documents:**
 - System architecture diagrams.
 - API documentation.
 - User interface mockups.
